Learning Toolkits Syllabus

UT

R1. Learning

Toolkits Syllabus

R2. Digital

Microcredentials

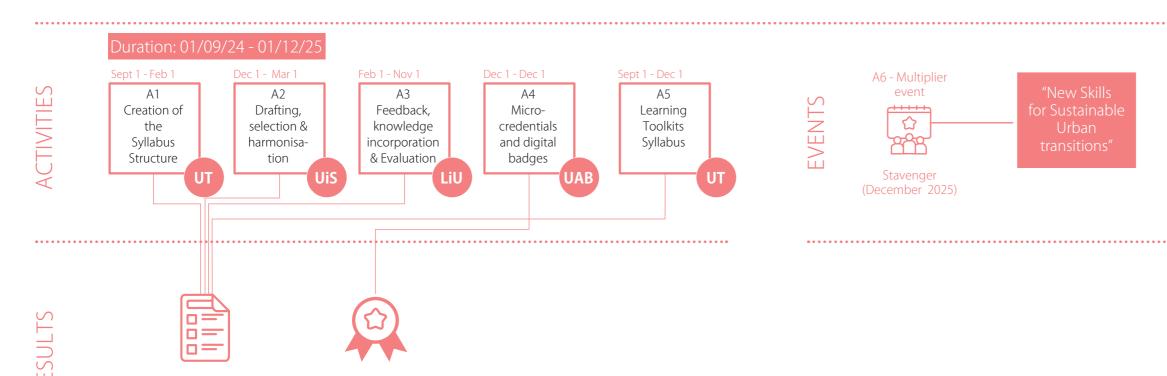

The Learning Toolkit Syllabus will comprise of diverse and complementary modules aimed at equipping participating students and learners with the relevant skills and competences for addressing the diverse challenges with a social entrepreneurship and environmentally responsibility perspective. They will be key during the implementation of the Pilot Programme, in order to capacitate the members of the Learning Communities and capture newly generated knowledge. In that sense they will adopt their content to the identified challenges (WP3.A3). The Toolkits will be produced in the English to ensure its transferability and wider outreach both during the project implementation as well for subsequent use and dissemination once validated. (for example through the ECIU University channels and operations). The modules will specif-

Gender perspective / inclusivity

ically focus on:

- Digital and green skills to tackle identified challenges
- Qualitative and quantitative techniques for the data collection and analysis;
- Conceptual and practical tools for innovation and transdisciplinary collaboration
- Communication; The art of selling a promising idea

A second objective is to explore **Z** and test the concept of Micro-credentials / digital badges, as following therecommendation of the EC to support the development, implementation and recognition of micro-credentials across institutions, businesses, sectors and borders. (https://education.ec.europa.eu/education-levels/higher-education/microcredentials). The Learning Communities will provide the platform for the horizontal and cross-sectoral application and implementation of the concept: "Micro-credentials certify the learning outcomes of short-term learning experiences, for example a short course or training. They offer a flexible, targeted way to help people develop the knowledge, skills and competences they need for their personal and professional development".

Qualitative and quantitative indicators

of micro-modules included in the catalogue

Q - diversity of topics covered

of stakeholders that have participated in the creation of the toolkit

of learners that have used the toolkit

Q - types of learners

of micromodules included in the final Learing Toolkit Syllabus

of micro-credentials issued

Q - types of learners that have received the micro-credential

Q - Feedback from learners -

O - Feedback from stakeholders -

of ECIU member Universities presented

of Leto member onlyersities presented

of non-ECIU universities or other EUA initiatives

of events national / international where the

Syllabus was presented

Expected number is **120 - 250 participants**, at the beginning and end of the WP respectively. The profiles of the participants in the WP will be the following:

35% Academic (Researchers, Professors, Technicians, PhD, Students) **65% Stakeholders** (Public Administration, Innovation Labs, Hubs, Technological Centers, SMEs, other HEIs & other key societal stakeholderss)
